

## REMARKS

In response to the Examiner's request, as set forth in the Notice of Allowability dated December 21, 2006 in the subject U.S. patent application, in which the issue fee and the publication fee are being paid concurrently, the original formal patent drawings, consisting of Figs. 1-6 on sheets 1-4, are being cancelled. Replacement Sheets 1-4 and New Sheet 5, consisting of Figs. 1-7 are being substituted therefore. These Replacement Sheets and New Sheet include the drawing changes approved by the Examiner in the Notice of Allowability. These changes do not constitute any new matter and their entry into the subject patent application is requested.

It is further requested that paragraph 019 of the Substitute Specification be amended. During a review of that paragraph, as amended by the Examiner in the Notice of Allowability, it was noted that the satellite printing group discussed there was referred to as a six-cylinder satellite group. In fact, it is a nine-cylinder satellite group. As described in paragraph 019, the satellite printing group includes four cylinder pairs and a common counter-pressure cylinder. Such a satellite printing group, as depicted in newly added Figure 7, is a nine-cylinder satellite printing group. It is asserted that this change does not add any new matter but instead corrects an obvious translational error.

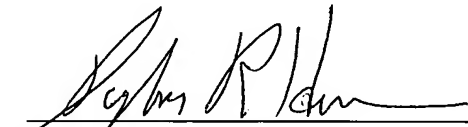

## SUMMARY

All of the formal patent drawings previously in the application have been cancelled in favor of newly submitted drawings that include the changes set forth in the Notice of Allowability. Paragraph 019 of the Substitute Specification, as amended by the Examiner, has been further amended to correct a translational error. These changes do not constitute any new matter. Entry of the Amendment under 37 CFR 1.312 in the subject U.S. patent application, in which the issue fee and the publication fee are being paid concurrently, is respectfully requested.

Respectfully submitted,
